

# CONTENTS

<b>Introduction .....</b>	<b>1-1</b>
Product Development .....	1-2
Structure .....	1-2
Objectives .....	1-2
Conventions.....	1-2
Introduction to Exercises .....	1-3
Exercise Conventions .....	1-4
<b>Linux Overview .....</b>	<b>2-1</b>
The History of Linux .....	2-2
The Free Software Model .....	2-2
Proprietary Software Under Linux.....	2-4
Lesser General Public License .....	2-5
Applying the GPL to Your Programs .....	2-6
Hardware .....	2-7
Loadable Device Modules .....	2-11
Software .....	2-11
GUI Window Managers .....	2-12
Programming Languages .....	2-12
GUI is Optional.....	2-13
Remote Administration is Easy.....	2-13
Rebooting is Uncommon .....	2-14
Viruses Are Almost Non-existent.....	2-14

Greater Security .....	2-14
Linux Limitations.....	2-14
Linux Distributions .....	2-16
FHS and LSB .....	2-18
System Administration.....	2-19
Operational (vs. Administrative) Duties .....	2-19
Administrative (vs. Operational) Duties .....	2-20
Support .....	2-21
System Documentation .....	2-21
Providing User Support .....	2-21
<b>Installing a Linux Workstation .....</b>	<b>3-1</b>
Types of Servers and Workstations.....	3-2
Identify Your Hardware .....	3-3
Determine Network Settings .....	3-5
Installation Methods .....	3-5
Installing From a CD-ROM or DVD-ROM .....	3-5
Creating a Boot Floppy .....	3-5
Installing From a Network .....	3-6
Install or Upgrade .....	3-7
Disk Partitioning .....	3-7
Swap Space .....	3-8
File System Types .....	3-9
ext2fs .....	3-9
ext3fs .....	3-10
ReiserFS.....	3-10
XFS .....	3-10
JFS .....	3-11
Partitioning the Drive.....	3-11
fdisk .....	3-11
Drive and Partition Names .....	3-12
Commands .....	3-13
Partition Attributes .....	3-13
Partition ID Type .....	3-14
The fdisk Procedure .....	3-14

Other Partitioning Methods .....	3-15
Software Choices .....	3-16
Hardware Configuration .....	3-16
System Services .....	3-16
X Window System Installation .....	3-18
The 1024 Cylinder Limit.....	3-19
Boot Loaders: LILO, GrUB, and LOADLIN.....	3-20
LILO .....	3-20
GrUB .....	3-20
LOADLIN .....	3-20
init and /etc/inittab .....	3-21
Linux Boot Sequence.....	3-22
Pre-install.....	3-23
Preparation .....	3-24
Installation .....	3-24
Configuration .....	3-26
<b>Linux Usage .....</b>	<b>4-1</b>
Command Line Basics.....	4-2
Command Line Syntax.....	4-2
Navigating the Directory Tree .....	4-5
The ls Command .....	4-6
Hidden Files .....	4-6
The cd Command .....	4-7
The pwd Command .....	4-8
su and sudo .....	4-11
Viewing File Permissions .....	4-15
Symbolic Links (symlinks) .....	4-16
Copying, Moving, and Removing Files .....	4-16
The cp Command .....	4-16
The mv Command .....	4-17
The rm Command .....	4-17
Creating and Deleting Directories.....	4-18
Working In the Linux Shell .....	4-20
User Environment Files.....	4-20

Environment .....	4-21
Using the bash Shell .....	4-24
Command History and Editing .....	4-25
Commands with Recursive Options .....	4-26
<b>vi .....</b>	<b>5-1</b>
Linux Text Editors .....	5-2
Basic vi.....	5-2
vi modes.....	5-3
Moving Within a File .....	5-5
Global Replacement and Regular Expressions.....	5-7
The set Command .....	5-7
The .exrc File .....	5-8
Executing Commands .....	5-8
Splitting Windows .....	5-8
Diffs .....	5-11
Buffers .....	5-13
Listing Buffers .....	5-13
Editing Buffers .....	5-14
<b>Getting Help .....</b>	<b>6-1</b>
Identifying the System .....	6-2
System Default Files.....	6-3
man Pages and the man Command .....	6-4
Identifying and Communicating with Active Users.....	6-6
Communicating with Users .....	6-7
Login Prompts .....	6-8
The find Command.....	6-8
The locate Command.....	6-10
Locating Commands .....	6-11
Identifying Files .....	6-14
<b>Documentation .....</b>	<b>7-1</b>
Manual Pages and the man Command.....	7-2
Manual Entries.....	7-5
Related Commands .....	7-6
The info Command.....	7-8

Documentation in /usr/share/doc .....	7-9
Online Documentation .....	7-9
The Linux Documentation Project .....	7-10
Usenet Newsgroups .....	7-11
Newsgroup Archives .....	7-11
Hardcopy Documentation .....	7-12
<b>File Systems .....</b>	<b>8-1</b>
File System Structure .....	8-2
File System Types .....	8-4
Making a File System .....	8-4
Mounting a File System .....	8-5
Command Line Mounting .....	8-5
Mounting with /etc/fstab .....	8-6
Mounting Microsoft (MS-DOS) Partitions .....	8-7
Mounting Removable Media in a GUI .....	8-8
Unmounting Partitions .....	8-8
Repairing Corrupted File Systems .....	8-12
The lost+found Directory .....	8-13
Managing File Systems .....	8-14
Kernel File Cache .....	8-14
Disk Free (df) .....	8-14
Disk Usage (du) .....	8-15
Quota .....	8-16
User Disk Quota .....	8-16
Reporting on a User's Quota Status .....	8-17
Configuring Quota .....	8-18
Maintaining Quota .....	8-19
<b>Files and Directories .....</b>	<b>9-1</b>
Standard Directories .....	9-2
The Linux File System .....	9-5
Overview .....	9-6
Opening a File .....	9-7
File and Directory Permission .....	9-7
File Manipulation Permissions .....	9-10

Setting User and Group IDs .....	9-11
Programs .....	9-12
The Sticky Bit .....	9-13
File Permission Commands .....	9-13
The chown Command .....	9-13
The chgrp Command .....	9-14
The chmod Command .....	9-14
The chattr Command .....	9-16
Permissions and Ownership in a GUI .....	9-17
File-related Commands .....	9-17
Links .....	9-19
Why Use Links? .....	9-19
The ln Command .....	9-20
Hard Link .....	9-24
Symbolic Link .....	9-24
<b>Package Management .....</b>	<b>10-1</b>
Red Hat Package Manager (rpm) .....	10-3
rpm Package Naming Conventions .....	10-4
RPM Commands .....	10-4
The rpmrc File .....	10-7
Debian Package Manager (dpkg) .....	10-10
The dselect Command .....	10-12
The apt Command .....	10-12
Non-Debian Packages — alien .....	10-13
Installing Software from Source .....	10-14
Unpacking the Tarball .....	10-14
tar .....	10-14
gzip and gunzip .....	10-15
configure .....	10-15
make and make install .....	10-16
Using Packages Without a Package Manager .....	10-20

**Appendix A**

<b>Exercise Solutions .....</b>	<b>A-1</b>
Exercise Exercise 3-1: SUSE Linux Enterprise Server (SLES) 10 Installation.....	A-1
Pre-install .....	A-2
Preparation .....	A-2
Installation .....	A-3
Configuration .....	A-5
Exercise Exercise 3-2: The inittab File.....	A-8
Exercise Exercise 4-1: Using the Command Line. ....	A-10
Exercise Exercise 4-2: Using sudo and visudo .....	A-13
Exercise Exercise 4-3: Creating, Moving, and Deleting Directories. ....	A-15
Exercise Exercise 5-1: Using vi. ....	A-18
Exercise Exercise 6-1: Using and Customizing man Pages. ....	A-24
Exercise Exercise 6-2: System Information. ....	A-25
Exercise Exercise 6-3: Using find and locate. ....	A-26
Exercise Exercise 6-4: Identifying Files. ....	A-32
Exercise Exercise 7-1: Using man Pages. ....	A-33
Exercise Exercise 8-1: Using and Creating File Systems .....	A-35
Exercise Exercise 8-2: Using tune2fs. ....	A-39
Exercise Exercise 8-3: Managing Disk Space.....	A-40
Exercise Exercise 8-4: Configuring Quotas. ....	A-41
Exercise Exercise 9-1: File Permissions. ....	A-45
Exercise Exercise 9-2: Using Links. ....	A-48
Exercise Exercise 10-1: Installing RPM Packages.....	A-50
Exercise Exercise 10-2: Installing Software from Source. ....	A-53

**Appendix B**

<b>Quick Reference .....</b>	<b>B-1</b>
Command Summary .....	B-1
Useful Commands for the Shell Environment .....	B-1
Useful Commands for File Management.....	B-2
Useful Commands for System Administration.....	B-4
Important Configuration Files .....	B-5
Shell Pattern-Matching Characters.....	B-6
Special Cases .....	B-7

bash Special Characters .....	B-7
Regular Expressions .....	B-8
vi Quick Reference .....	B-9
Starting vi.....	B-9
Moving Around the File .....	B-9
Inserting Text.....	B-10
Changing/Deleting/Cutting and Pasting Text .....	B-10
Searching for Text.....	B-11
Miscellaneous .....	B-12
Writing the File .....	B-12
Leaving vi .....	B-12
ex Commands .....	B-12
Useful set Options.....	B-13
emacs Editing Mode .....	B-13
<b>Appendix C</b>	
<b>The Open Source Definition .....</b>	<b>C-1</b>
Introduction .....	C-1
1. Free Redistribution .....	C-1
2. Source Code .....	C-1
3. Derived Works .....	C-2
4. Integrity of The Author's Source Code .....	C-2
5. No Discrimination Against Persons or Groups .....	C-2
6. No Discrimination Against Fields of Endeavor .....	C-2
7. Distribution of License.....	C-2
8. License Must Not Be Specific to a Product .....	C-3
9. License Must Not Restrict Other Software .....	C-3
10. License Must Be Technology-Neutral .....	C-3
<b>Appendix D</b>	
<b>GNU General Public License Version 2 .....</b>	<b>D-1</b>
Preamble .....	D-1
GNU General Public License Terms and Conditions for Copying, Distribution and Modification.....	D-2
How to Apply These Terms to Your New Programs .....	D-6
<b>Appendix E</b>	
<b>Index .....</b>	<b>E-1</b>
