

CONTENTS

Introduction	1-1
Course Format	1-2
Product Development	1-2
Structure	1-2
Objectives	1-2
Conventions.....	1-2
Introduction to Exercises	1-3
Exercise Conventions	1-4
Linux Overview	2-1
The History of Linux	2-2
The Free Software Model	2-2
Proprietary Software Under Linux.....	2-4
Lesser General Public License	2-5
Applying the GPL to Your Programs	2-6
Hardware	2-7
Loadable Device Modules	2-11
Software	2-11
GUI Window Managers	2-12
Programming Languages	2-12
GUI is Optional.....	2-13
Remote Administration is Easy.....	2-13
Rebooting is Uncommon	2-14

Viruses Are Almost Non-existent	2-14
Greater Security	2-14
Linux Limitations.....	2-14
Linux Distributions	2-16
FHS and LSB	2-18
System Administration.....	2-19
Operational (vs. Administrative) Duties	2-19
Administrative (vs. Operational) Duties	2-20
Support	2-21
System Documentation	2-21
Providing User Support	2-21
Installing a Linux Workstation	3-1
Installation Options	3-2
Types of Servers and Workstations.....	3-2
Identify Your Hardware	3-3
Determine Network Settings	3-5
Installation Methods	3-5
Installing From a CD-ROM or DVD-ROM	3-5
Creating a Boot Floppy	3-5
Installing From a Network	3-6
Install or Upgrade	3-7
Disk Partitioning	3-7
Swap Space	3-8
File System Types	3-9
ext2fs	3-9
ext3fs	3-10
ReiserFS.....	3-10
XFS	3-10
JFS.....	3-11
Partitioning the Drive.....	3-11
fdisk	3-11
Drive and Partition Names	3-12
Commands	3-13
Partition Attributes	3-13

Partition ID Type	3-14
The fdisk Procedure	3-14
Other Partitioning Methods	3-15
Software Choices	3-16
Hardware Configuration	3-16
System Services	3-16
X Window System Installation	3-18
The 1024 Cylinder Limit.....	3-19
Boot Loaders: LILO, GrUB, and LOADLIN.....	3-20
LILO	3-20
GrUB	3-20
LOADLIN	3-20
init and /etc/inittab	3-21
Linux Boot Sequence.....	3-22
Pre-install	3-23
Preparation	3-24
Installation	3-24
Configuration	3-26
Summary	3-30
Hardware	4-1
Hardware	4-2
System Boot Procedure	4-2
POST	4-3
BIOS and CMOS	4-4
Drives	4-4
Floppy Drives	4-4
IDE Drives	4-5
SATA Drives.....	4-6
SCSI	4-6
SCSI-1	4-7
SCSI-2	4-7
SCSI-3	4-7
SCSI Device Configuration	4-8
The SCSI BIOS	4-11

Peripheral Devices: AGP, ISA, and PCI	4-11
AGP	4-11
ISA	4-11
PCI	4-12
Hot Swappable Hardware	4-13
USB	4-13
IEEE 1394.....	4-14
PCMCIA and CardBus.....	4-14
Mobile Hardware	4-14
Other Peripherals	4-15
Addresses, Channels, and Ports	4-15
IRQ	4-16
I/O Addresses	4-17
DMA.....	4-18
COM Ports.....	4-19
Printer Ports (LPT).....	4-20
SCSI Device Numbering	4-20
Adding and Configuring Devices	4-21
Devices and Drivers	4-21
ISA/Plug and Play	4-22
Hotplugging	4-22
Network Interface Controllers (NIC).....	4-26
Adding RAM	4-27
Modems.....	4-27
UARTs	4-28
Audio Controllers	4-29
The Linux Kernel	4-30
The ALSA Project	4-30
OSS Commercial Sound Drivers	4-30
USB	4-31
USB Modules	4-31
Summary.....	4-35
Linux Usage	5-1
Command Line Basics.....	5-2

Command Line Syntax.....	5-2
Navigating the Directory Tree	5-5
The ls Command	5-6
Hidden Files	5-6
The cd Command	5-7
The pwd Command	5-8
su and sudo	5-11
Viewing File Permissions	5-15
Symbolic Links (symlinks)	5-16
Copying, Moving, and Removing Files	5-16
The cp Command	5-16
The mv Command	5-17
The rm Command	5-17
Creating and Deleting Directories	5-18
Working In the Linux Shell	5-20
User Environment Files	5-20
Environment	5-21
Using the bash Shell.....	5-24
Command History and Editing	5-25
Commands with Recursive Options	5-26
Summary	5-27
Getting Help	6-1
System Information	6-2
Identifying the System	6-2
System Default Files	6-3
man Pages and the man Command	6-4
Identifying and Communicating with Active Users.....	6-6
Communicating with Users	6-7
Login Prompts	6-8
The find Command.....	6-8
The locate Command.....	6-10
Locating Commands	6-11
Identifying Files.....	6-14
Summary	6-16

vi	7-1
Linux Text Editors	7-2
Basic vi.....	7-2
vi modes.....	7-3
Moving Within a File	7-5
Global Replacement and Regular Expressions.....	7-7
The set Command	7-7
The .exrc File	7-8
Executing Commands	7-8
Splitting Windows	7-8
Diffs.....	7-11
Buffers	7-13
Listing Buffers	7-13
Editing Buffers	7-14
Summary.....	7-21
File Systems	8-1
File System Structure	8-2
File System Types	8-4
Making a File System.....	8-4
Mounting a File System.....	8-5
Command Line Mounting	8-5
Mounting with /etc/fstab	8-6
Mounting Microsoft (MS-DOS) Partitions	8-7
Mounting Removable Media in a GUI	8-8
Unmounting Partitions	8-8
Repairing Corrupted File Systems.....	8-12
The lost+found Directory	8-13
Managing File Systems	8-14
Kernel File Cache	8-14
Disk Free (df).....	8-14
Disk Usage (du).....	8-15
Quota.....	8-16
User Disk Quota.....	8-16
Reporting on a User's Quota Status	8-17

Configuring Quota.....	8-18
Maintaining Quota.....	8-19
Summary	8-28
Files and Directories	9-1
Standard Directories	9-2
The Linux File System	9-5
Overview	9-6
Opening a File	9-7
File and Directory Permission.....	9-7
File Manipulation Permissions	9-10
Setting User and Group IDs.....	9-11
Programs	9-12
The Sticky Bit.....	9-13
File Permission Commands	9-13
The chown Command	9-13
The chgrp Command	9-14
The chmod Command	9-14
The chattr Command	9-16
Permissions and Ownership in a GUI	9-17
File-related Commands.....	9-17
Links.....	9-19
Why Use Links?	9-19
The ln Command	9-20
Hard Link	9-24
Symbolic Link	9-24
Summary	9-26
The X Window System	10-1
The X Window System.....	10-2
X Client/Server Model.....	10-2
Gathering Information	10-3
Video Card	10-3
Monitor	10-4
Obtaining X.....	10-4
X Configuration Files	10-5

X Configuration File Sections	10-5
The Files Section	10-7
The ServerFlags Section	10-8
The Module Section	10-8
The InputDevice Section	10-9
The Monitor Section	10-11
The Modes Section	10-11
The Screen Section	10-12
The Device Section	10-14
The ServerLayout Section	10-14
The DRI Section	10-15
Configuring the X Window System.....	10-16
X Utilities	10-16
SaX2	10-17
Starting the X Window System.....	10-18
Adjusting the X Window System.....	10-19
The xwininfo Utility	10-19
The xvidtune Utility	10-21
X Resource Files	10-22
The Xresources File	10-22
The .xsession File	10-22
The .xscreensaver File	10-23
Remote X Clients	10-24
The xhost Command	10-24
X Stations and X Terminals.....	10-25
Installing and Managing Fonts Under X	10-26
Understanding the Font Path	10-26
Adding Directories to the Font Path	10-27
Font Servers	10-27
Window Managers and Desktop Environments.....	10-28
xdm	10-30
Modifying xdm	10-31
Configuring and Using KDE.....	10-32
KDM	10-33

Configuring and Using GNOME	10-33
GDM	10-34
Terminal Emulators	10-34
Summary	10-36
Package Management	11-1
Package Managers	11-2
Red Hat Package Manager (rpm).....	11-3
rpm Package Naming Conventions	11-4
RPM Commands	11-4
The rpmrc File	11-7
Debian Package Manager (dpkg).....	11-10
The dselect Command	11-12
The apt Command	11-12
Non-Debian Packages — alien.....	11-13
Installing Software from Source.....	11-14
Unpacking the Tarball	11-14
tar	11-14
gzip and gunzip.....	11-15
configure	11-15
make and make install	11-16
Using Packages Without a Package Manager.....	11-20
Summary	11-21
Managing Shared Libraries	12-1
Managing Shared Libraries.....	12-2
System Library File Names and Locations.....	12-2
The libc and ld.so/ld-linux.so Libraries	12-3
Updating libc and Other Libraries	12-3
Other Files Related to Shared Libraries	12-4
Commands Related to System Libraries	12-5
Installing and Supporting Multiple Versions of a Shared Library.....	12-6
Over-riding the Shared Library Loading Mechanism	12-7
Errors Related to Missing or Damaged Shared Libraries.....	12-8
Summary	12-9
Text Processing	13-1

Text Processing	13-2
The grep Family	13-2
Regular Expressions	13-3
Filters	13-5
sed	13-7
Addressing and Editing Commands	13-8
The tr Utility	13-12
The hexdump Command	13-13
Redirecting Input, Output, and Errors	13-15
Input	13-15
Output	13-16
Errors	13-16
Pipes	13-17
Summary	13-20
Processes	14-1
Processes	14-2
The Linux Kernel	14-2
Programs and Processes	14-3
Processes and the Kernel	14-4
Daemons and Zombies	14-4
Key Attributes of a Process	14-5
Running Processes	14-6
Checking on Processes	14-7
The top Command	14-9
nice and renice	14-11
Background Jobs	14-12
Signals	14-14
Sending Signals	14-15
Intercepting Signals	14-18
Summary	14-21
Appendix A	
Exercise Solutions	A-1
Exercise Exercise 3-1: SUSE Linux Enterprise Server (SLES) 10 Installation	A-1
Pre-install	A-2

Preparation	A-2
Installation	A-3
Configuration	A-5
Exercise Exercise 3-2: The inittab File.....	A-8
Exercise Exercise 5-1: Using the Command Line.	A-10
Exercise Exercise 5-2: Using sudo and visudo	A-13
Exercise Exercise 5-3: Creating, Moving, and Deleting Directories.	A-15
Exercise Exercise 6-1: Using and Customizing man Pages.	A-18
Exercise Exercise 6-2: System Information.	A-19
Exercise Exercise 6-3: Using find and locate.	A-20
Exercise Exercise 6-4: Identifying Files.	A-26
Exercise Exercise 7-1: Using vi.	A-27
Exercise Exercise 8-1: Using and Creating File Systems	A-33
Exercise Exercise 8-2: Using tune2fs.	A-37
Exercise Exercise 8-3: Managing Disk Space.....	A-38
Exercise Exercise 8-4: Configuring Quotas.	A-39
Exercise Exercise 9-1: File Permissions.	A-43
Exercise Exercise 9-2: Using Links.	A-46
Exercise Exercise 11-1: Installing RPM Packages.....	A-48
Exercise Exercise 11-2: Installing Software from Source.	A-51
Exercise Exercise 12-1: Library Utilities.	A-54
Exercise Exercise 13-1: Regular Expressions and grep.	A-56
Exercise Exercise 13-2: Using Filters.	A-58
Exercise Exercise 13-3: Using the sed Utility.	A-59
Exercise Exercise 13-4: Using the tr Utility.	A-61
Exercise Exercise 13-5: Redirecting Input and Output.....	A-62
Exercise Exercise 14-1: Identifying and Listing Processes.	A-64
Exercise Exercise 14-2: Sending Signals.	A-66
Exercise Exercise 14-3: Trapping Signals.	A-68
Appendix B	
Quick Reference	B-1
Command Summary	B-1
Useful Commands for the Shell Environment	B-1
Useful Commands for File Management.....	B-2

Useful Commands for System Administration	B-4
Important Configuration Files	B-5
Shell Pattern-Matching Characters	B-6
Special Cases	B-7
bash Special Characters	B-7
Regular Expressions	B-8
vi Quick Reference	B-9
Starting vi	B-9
Moving Around the File	B-9
Inserting Text	B-10
Changing/Deleting/Cutting and Pasting Text	B-10
Searching for Text	B-11
Miscellaneous	B-12
Writing the File	B-12
Leaving vi	B-12
ex Commands	B-12
Useful set Options	B-13
emacs Editing Mode	B-13
Appendix C	
LPI 101 Exam Objectives	C-1
Topic 101: Hardware & Architecture	C-1
1.101.1 Configure Fundamental BIOS Settings	C-1
1.101.3 Configure Modem and Sound cards	C-2
1.101.4 Setup non-IDE Devices	C-2
1.101.5 Setup different PC expansion cards	C-3
1.101.6 Configure Communication Devices	C-3
1.101.7 Configure USB devices	C-3
Topic 102: Linux Installation & Package Management	C-4
1.102.1 Design hard disk layout	C-4
1.102.2 Install a boot manager	C-4
1.102.3 Make and install programs from source	C-5
1.102.4 Manage shared libraries	C-5
1.102.5 Use Debian package management	C-6
1.102.6 Use Red Hat Package Manager (RPM)	C-6

Topic: 103 GNU & Unix Commands	C-6
1.103.1 Work on the command line.....	C-6
1.103.2 Process text streams using filters	C-7
1.103.3 Perform basic file management	C-7
1.103.4 Use streams, pipes and redirects.....	C-8
1.103.5 Create, monitor and kill processes	C-8
1.103.6 Modify process execution priorities	C-9
1.103.7 Search text files using regular expressions	C-9
1.103.8 Perform basic file editing operations using vi.....	C-9
Topic 104: Devices, Linux File systems, File system Hierarchy Standard.....	C-10
1.104.1 Create partitions and file systems.....	C-10
1.104.2 Maintain the integrity of file systems.....	C-10
1.104.3 Control mounting and unmounting file systems	C-11
1.104.4 Managing disk quota.....	C-11
1.104.5 Use file permissions to control access to files	C-11
1.104.6 Manage file ownership	C-12
1.104.7 Create and change hard and symbolic links	C-12
1.104.8 Find system files and place files in the correct location	C-13
Topic 110: The X Window System	C-13
1.110.1 Install & Configure X11	C-13
1.110.2 Setup a display manager.....	C-14
1.110.4 Install & Customize a Window Manager Environment	C-14
Appendix D	
GNU General Public License Version 2	D-1
Preamble	D-1
GNU General Public License Terms and Conditions for Copying, Distribution and Modification	D-2
How to Apply These Terms to Your New Programs.....	D-6
Appendix E	
The Open Source Definition	E-1
Introduction.....	E-1
1. Free Redistribution	E-1
2. Source Code.....	E-1
3. Derived Works	E-2
4. Integrity of The Author's Source Code.....	E-2

- 5. No Discrimination Against Persons or Groups E-2
- 6. No Discrimination Against Fields of Endeavor E-2
- 7. Distribution of License E-2
- 8. License Must Not Be Specific to a Product E-3
- 9. License Must Not Restrict Other Software E-3
- 10. License Must Be Technology-Neutral E-3
- Appendix F**
- Index F-1**
